Students watching the animals

The Department of Zoology and Genetics organized an educational visit to Bannerghatta Biological Park for the 6th Semester B.Sc. Zoology students. It was a highly enriching experience and effectively bridged the gap between theoretical learning and practical understanding. Observing live animals, studying taxidermy specimens, and interacting with a practicing biologist Ms. Aishwarya added significant value to their academic curriculum. The visit not only broadened the student's knowledge but also inspired them to consider future careers in wildlife research, conservation, and management. Students were able to relate textbook concepts to real-world observations, reinforcing their classroom learning. Such experiential learning opportunities are essential in nurturing scientific curiosity and environmental responsibility among budding zoologists.
